Attn: Ken Rone

Re: Seattle Plant Modernization

Dear Mr. Rone:

We have received authorization to proceed with an analysis of the drainage situation at Ash Grove. As outlined in our proposal to Steve Rinella (Smith & Monroe & Gray), we are ready to initiate this investigation by reviewing any correspondence pertaining to on-site drainage which is available.

We are particularly interested in correspondence between Ash Grove and the City of Seattle, Metro, Washington Department of Ecology and any other agency which may have jurisdiction in this matter. Correspondence involving Stoneway Concrete and Ash Grove relative to drainage would also be helpful.

We have sent a request similar to this one to Nate Fernow. Although he can provide us with information which should shed some light on technical elements, your input relative to past Ash Grove relationships with Stoneway Concrete, City of Seattle, Metro, DOE and other applicable agencies would be very useful to the purposes of our analysis. Your comments, suggestions and observations would be greatly appreciated. Any information you find can be sent to the address below. You are also encouraged to Fax material to our office.
